DETAILED ACTION

The amendment filed on 05/20/2009 has been entered. Pending claims 21-36 and 38-40 are found to be in condition for allowance.

Reason for Allowance

1. The following is an examiner's statement of reasons for allowance: the prior arts of record fail to anticipate or render obvious the following claimed features:

embedding resource control information to be transmitted between the mobile node and the correspondent node in a message which is sent via the routing path of a reserved connection for the nodes; and]

setting those attribute values carried in an IP datagram header to zero which permit reservation end points to interpret the situation of routing asymmetry if upstream and downstream paths for a bidirectional reservation do not follow identical routes at a specific routing node along the reserved routing path as recited in independent claim 21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior arts made of record and not relied upon are considered pertinent to applicant's disclosure:

Packer (US 5,802,106) teaches *Method for data rate detection and asymmetric path based on latency*.

Fodor et al. (US 2001/0027490 A1) teaches *RSVP handling in 3G networks*

Chen (US 2001/0054103 A1) teaches *Resource reservation using RSVP to set up bi-directional PDP context*.

Guo et al. (US 2002/0054405 A1) teaches *A method of providing bi-directional paths that can be implemented as an extension to the RSVP traffic engineering*.
